

Vista Series

The Vista family is a series of totally compatible control panels designed to support the easiest to use end user devices available. Vista offers more flexibility & simpler programming along with features that customers want. As the world's largest manufacturer of electronic security products, Honeywell builds proven performance into everything we make. Combine this with the 5800 Series wireless transmitters, and you now have the most reliable, convenient and cost effective solutions for security protection.

A blend of head turning style and sophisticated technology, the state of the art touchscreen keypad makes security system operation easier than ever – with graphics and simple prompts guiding you every step of the way. By just touching the graphics on the intuitive, easy to read touchscreen display, you can conduct a variety of everyday tasks with unprecedented ease.

Our products do more than keep you safe...they can improve household communication, make your home more comfortable and provide a level of simplicity and convenience you'll really appreciate. Best of all, they can enhance the quality of life.

With solid features and robust system capacities, you'll find Vista panels to be the ideal choice for all your installations.
